City Spies: Forbidden City by James Ponti is another fun spy book and is the third in the series. I originally wanted to read this book because the first 2 were really good.

The book is about the team of city spies who are now trying to stop an evil organization called umbra recruit a nuclear scientist. They race across countries, have many near death experiences, and have lots of fun!

The characters are funny, smart and persistent. Anyone who wants a good mystery or spy book would love it. The cover is cool and well designed. I loved it and give it 10/10.
